

Surgical Consent Form & Hormone Pellet Consent

Patient Name: _____ DOB: _____

I have disclosed accurate and true information regarding my medical history, medication history and surgeries. I understand that bio-identical hormone replacement pellet insertion is a minor surgical procedure. I consent to this procedure. The procedure has been explained to me. I understand that as with any surgical procedure there are risks to the patient and no treatment or procedure is ever deemed 100% safe. I understand that the following are rare but a possibility as a result of this procedure:

- | | |
|---------------------------|--|
| Acne | Growth of pre-existing estrogen dependent tumors |
| Area infection | Increased facial hair growth |
| Area swelling | Loss of hair on scalp |
| Bleeding | Minor discomfort/pain |
| Bruising/soreness | Minor or slight scarring at the incision site |
| Deepening of voice | Pellet extrusion |
| Discoloration of the skin | |

I understand that once the pellet(s) have been inserted they cannot be removed. I understand that it takes most patients approximately 24 to 72 hours after the pellet insertion for the hormones to become active in the patient’s system. I agree to follow the written post-surgery instructions I am given.

I understand, and agree, to immediately contact the Heal n Cure staff at (847) 686-4444 if I experience partial or full pellet extrusion (exiting the body), excessive area pain, excessive bleeding and/or wound infection. I also agree that if I fail to report the previously mentioned situations that I will not hold Meena Malhotra M.D. liable for any negative physical, emotional or mental outcome. Either Dr. Malhotra, or a staff member, has explained and reviewed alternative methods of hormone replacement, and I understand that I have options. I request that the procedure be performed today.
